★ Issue 9: stopped matlab can not restart again

[< P](#)

1 person starred this issue and may be notified of changes.

Status: New**Owner:** ----**Type:** Defect**Priority:** Medium[Add a comment and
make changes below](#)Reported by [likejie](#), May 7, 2012**What steps will reproduce the problem?**

1. stop the matlab from matchlipse side
2. no way to start the matlab command window again without restarting the eclipse

What is the expected output? What do you see instead?

I expect to start the eclipse without having matlab started at the same time. I have some kind of manual control of starting and stopping matlab.

What version of the product are you using? On what operating system?

latest matchlipse, WINDOWS 7 64 bits

Please provide any additional information below.
