★ Issue 12: Meditor: Tab / formatting issues

[< Pre](#)

2 people starred this issue and may be notified of changes.

Status: New**Owner:** ----**Type:** Defect**Priority:** Medium[Add a comment and
make changes below](#)Reported by [markdd](#), Dec 4, 2012**What steps will reproduce the problem?**

1. Create new .m file
2. Hit Tab button

What is the expected output?

Tab button should create a tab.

What do you see instead?

No response, a tab is not entered.

Additionally, if spaces are used instead of a tab, followed by a line of text, is forced to the left when return is entered, removing the indentation.

What version of the product are you using? On what operating system?

Tested on

WinXP: Version: 4.2.0

Linux: Eclipse Java EE IDE

Please provide any additional information below.

This seems pretty basic and obvious, yet no other bug reports. Default setting used, is there some other configuration that might be conflicting?
