I saw this as well using 64-bit version of [R2011b](#) on Windows 7.

I downloaded Jacob from <http://sourceforge.net/projects/jacob-project/>, put the jacob-\*-x64.dll in Windows\SysWOW64 directory and the -x86 version in Windows\System32 and restarted Eclipse and it appeared to fix the problem.

Hi,

Please can everybody help me,

If I do New Matlab Project, I have this error : The selected wizard could not load class  
Plug-in org.eclipselabs.matclipse.mconsole was unable to load class  
org.eclipselabs.matclipse.mconsole.internal.ui.wizards.NewMatlabProjectWizard.  
An error occurred while automatically activating bundle org.eclipselabs.matcl  
(885).

What is the problem?

Thanks in advance.
